Academic Map: Allied Health

Associates of Applied Science (AAS) | 60 Credit Hrs | Catalog Year 2023 - 2024

DESCRIPTION: The Allied Health program establishes an excellent foundation for many allied health careers and educational programs. The purpose of this degree is to get students ready to either transfer into an allied health career program or to a pre-professional program at a four-year college. The degree is highly flexible and offers "focused" pathways to accommodate various pre-requisite requirements for the many health-related programs students may enter. Possible professions include but are not limited to: laboratory scientist, occupational therapy, pharmacy, physical therapy, physician assistant and nursing (BSN). **NOTE: AAS is not needed for students entering nursing; completion of degree may limit financial aid opportunities.** Students who complete an Allied Health Associate's Degree, including two courses in substance abuse as Concentration electives (e.g., PSYC 1130 and PSYC 1140) are eligible for certification as a Licensed Substance Abuse Associate by the Counseling and Therapy Practice Board of New Mexico.
